

12 Requirements

FEATURES IN RALLY STORIES

1. Input validation for failed users
2. Appropriate indicators for required fields
3. Definition of what each permission is/does
4. Add individual users directly to groups
 - a. There's a strange work around now
5. Filter by groups and permissions
 - a. APM and Power are group focused
 - b. Renewables uses individual users
 - c. B2B will use both

IDEAS FROM APM IN AHA

1. Nested admin- groups within groups
 - a. Requires new back and front end
 - b. Cross tenancy
2. Adding assets- make better
3. Show number of users in a tenant
4. Multi select assets- customizable queries
5. Search for users by SSO
6. Think through deleting users
 - a. Some want indicator that you're deleting a user
 - b. Some don't and want a disabled button
 - c. Undo button
7. Edit your profile- there are complications with this
8. Export CSV per group
